 **IKO**[®]

SHINGLE COLLECTIONS

Marathon Plus AR

Marathon™ Plus AR is our time-tested, traditional 3-tab shingle for affordable looks that fit your roof or out-building. Constructed with a durable fiberglass mat, Marathon Plus shingles are weather-resistant to shield your structure against the forces of nature.

Cambridge

Cambridge® shingles provide all the beauty of natural textured materials without the upkeep. Cambridge shingles are built to last with a Class 3 impact resistance rating against hail, fiberglass core strength, exceptional bonding, and built-in blue-green algae resistance.

DYNASTY®

Dynasty® high-performance laminated shingles provide a wider ArmourZone® nailing surface, and a Class 3 impact resistance rating against hail.

SHINGLE COLLECTIONS

NORDIC™

Nordic™ shingles are IKO's highest performing line with the highest level of impact resistance available and superior wind protection.

Amourshake™

Armourshake™ shingles offer exceptional design with dimensional thickness, and heavyweight construction. These shingles boast ultimate performance with a Class 3 impact resistance rating, or Class 4 (in Shadow Black only), helping protect against wind, water, and extreme temperatures.

Crowne Slate™

Crowne Slate™ shingles mimic the high-end appeal of natural slate tiles while offering 10" exposure and premium asphalt for ultimate protection. Heavy-duty construction cushions the impact of hail and other extreme weather, giving Crowne Slate shingles their Class 4 impact resistance rating — the highest available.

Royal Estate™

Random-cut contours and deep shadow bands give Royal Estate shingles a unique, yet bold look that's perfect for your home's architectural style. Royal Estate shingles offer ultimate durability thanks to heavy-duty construction and added asphalt, awarding them a Class 3 impact resistance rating.

ROLLED GOODS

StormShield®

StormShield® acts as a secondary barrier to help protect against wind-driven rain and unwanted moisture that can penetrate the shingle layer, causing leaks or ice dams.

ArmourGard

ArmourGard is a polymer-modified bitumen roll roofing protection membrane with a self-adhesive backing that prevents water penetration due to ice dams or wind-driven rain.

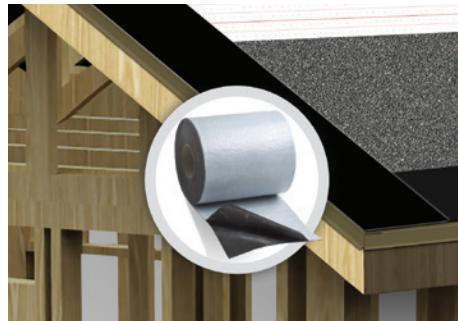

GoldShield™

GoldShield's self-adhesive membrane provides top-tier waterproofing in potential ice dam areas, as well as vent stacks, dormers, and other vulnerable spots.

Stormtite®

Stormtite's synthetic, non-breathable material effectively sheds water and acts as a vapor retarder while being flexible enough to install around vents, dormers, and skylights.

EdgeSeal®

EdgeSeal® roof starter bonds the drip edge, ice and water membrane, and first course of shingles to help create a secure, unified barrier.

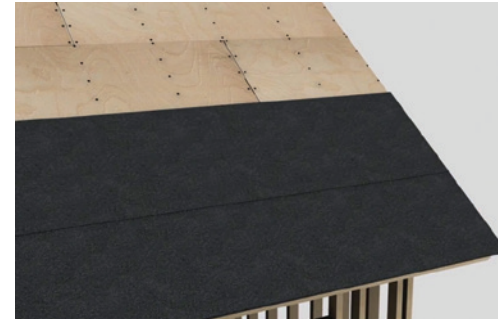

GoldSeam™

GoldSeam deck protection tape provides superior protection against leaks that can lead to ice damming, water infiltration, and rot.

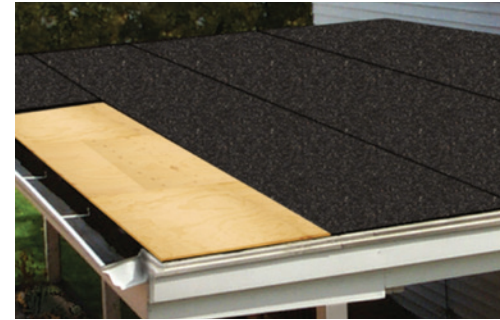

ROLLED GOODS / HIP & RIDGE

Roof-Fast™ Base

Roof-Fast Base provides a durable, reinforced mat of non-woven glass fibers when low-slope roof areas create installation and protection challenges.

Roof-Fast™ Cap

Roof-Fast™ Cap sheets provide a self-adhering, easy-to-apply rolled roofing membrane low-sloping roof areas are not suitable for shingles.

Hip and Ridge 12™ & Hip and Ridge Class 4

Instead of cutting up shingles to create caps, IKO's Hip and Ridge cap shingles offer a better-looking alternative in less time with a Class 4 impact resistance rating.

IKO UltraHP & UltraHP IR Ridge Cap Shingles

These high profile (HP) ridge cap shingles provide a textured, dimensional alternative to cut up shingles. No cutting or folding required.
