➤ trusscore

SAY HELLO trusscore

Trusscore's PVC-based wall and ceiling panels are an easy-to-install, high-performance replacement for traditional drywall and fiber-reinforced plastic (FRP) panels.

COMMON APPLICATIONS INCLUDE...

home garages and workshops, commercial projects, including hospitality venues, restaurants and offices, and agricultural applications from barns, to indoor grow rooms, to animal containment – any facility or room that requires a crisp, clean, long-lasting finish.

...AND GOODBYE DRYWALL!

TRUSSCORE WALL&CEILING BOARD

VS

DRYWALL

WATER-
RESISTANT

40%
LIGHTER

INSTALLS
4X FASTER

HEAVY &
AWKWARD

NOT DIY
FRIENDLY

Pre-finished Trusscore Wall&CeilingBoard panels are water-resistant, weigh 40% less than drywall, and install 4x faster. Panels come with a pre-punched screw flange and a tongue and groove interlocking system, making installation a breeze for DIYers and contractors alike.

Trusscore wall and ceiling panels are scratch, dent, and damage resistant and are designed to outlive the buildings they're installed in. Trusscore is made from PVC, which has a service life of 100 years and has a lower carbon manufacturing footprint than glass or metal.

Sheets of drywall are heavy, awkward to work with, and often require two people to install. You also need to know how to mud, tape, prime, and paint if you're planning on tackling the project yourself.

ORDER TRUSSCORE SAMPLES

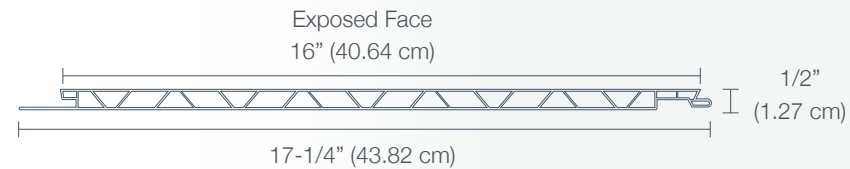

If you haven't used Trusscore before, samples of Trusscore Wall&CeilingBoard, Trusscore SlatWall, and Trusscore trim rings can help show you what you've been missing out on. Contact your Gillfor Account Manager for more information.

PVC-BASED PANELS & TRIMS

Available in white or grey.

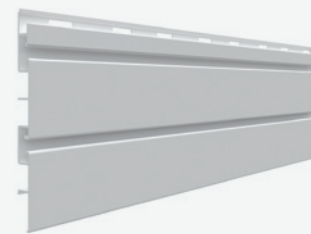

WALL&CEILING BOARD

Available in a full range of lengths, Trusscore Wall&CeilingBoard delivers superior performance and a seamless, finished look—ideal for residential, commercial, and agricultural applications.

SLATWALL

Trusscore SlatWall allows you to turn as much — or as little — of your wall into storage space. These 8-foot long, interlocking panels can be installed as a track, section, half wall, or a full wall.

NEW TRUSSCORE SNAP-IN TRIM WITH UNIVERSAL BASE

Snap-In J Trim

Top and bottom of walls, window and door perimeters, inside corners, SlatWall framing.

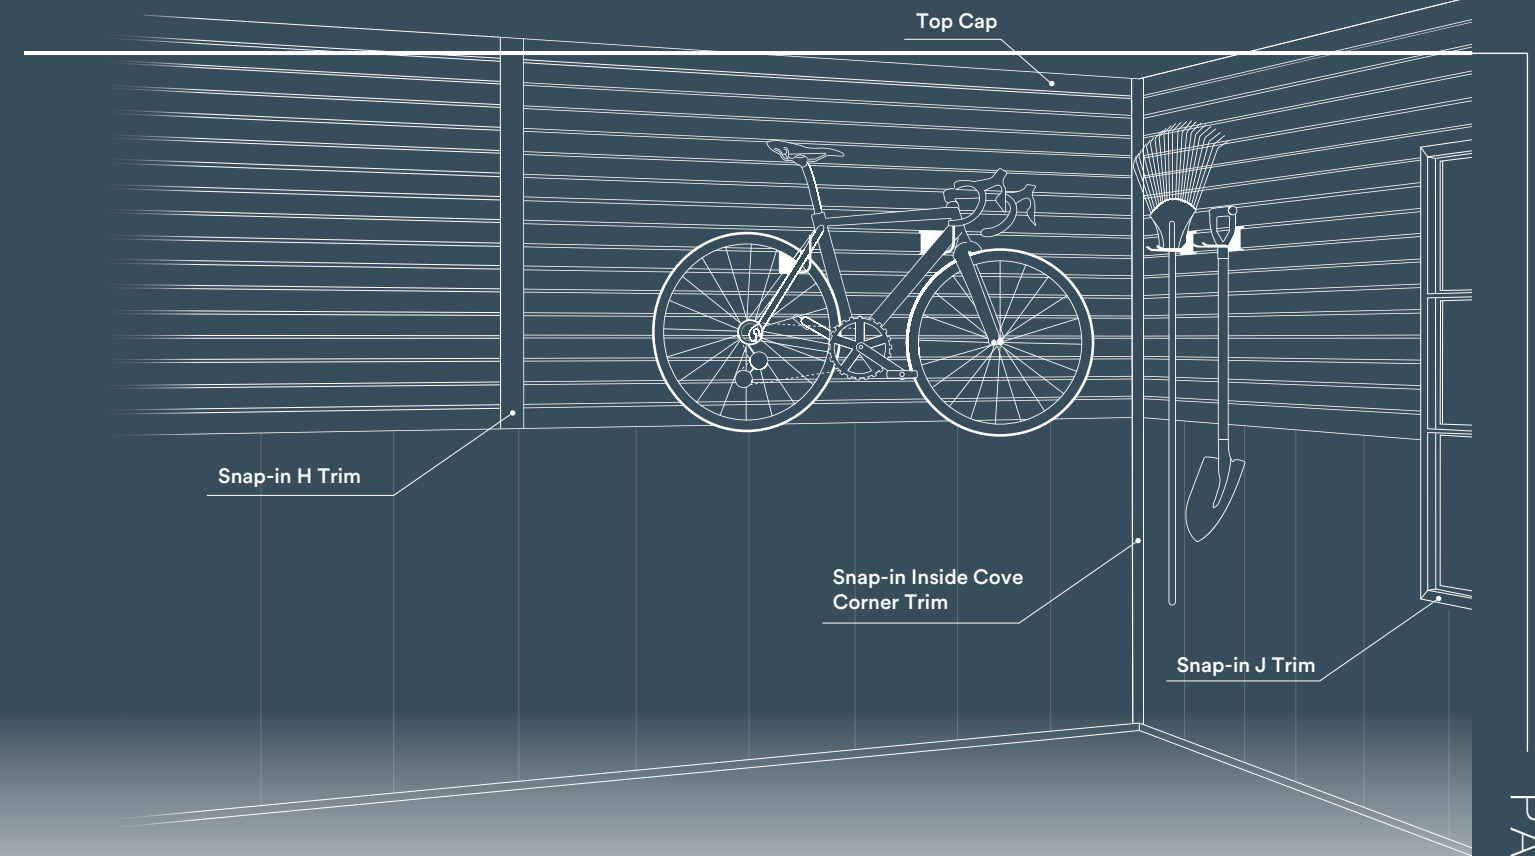

Snap-In Inside Corner Cove

Inside corners and wall perimeters.

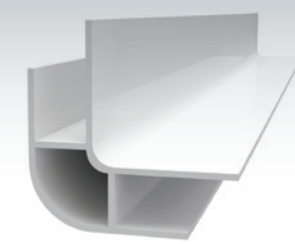

Snap-In H Trim

Panel joints and product transitions.

Large Outside Corner Trim

90° corners, windows, and doors.
1-1/4" or 2"

Outside Corner Rounded

Smooth, bullnosed outside corners.

Base Trim

Bottom wall transitions or high moisture environments.

Slatwall Top Cap

Top of SlatWall installation.

45° H Channel

Angled ceiling-to-ceiling transitions and angled wall-to-ceiling transitions.

F Trim

Soffit and bulkhead transitions.
